

**IN THE CLAIMS**

**Please amend the claims as indicated below:**

A1 1.(currently amended) A method of brokering data between handheld wireless devices and data rendering devices, comprising:

selecting data from a wireless device (WD) for rendering ~~at a data rendering device (DRD);~~

selecting a data rendering device (DRD) not assigned to said WD and located in a fixed location accessible by a WD user to render the ~~for rendering data;~~ and

providing the data to said DRD ~~based on~~ following commands entered by the WD user at said WD.

2.(currently amended) The method of claim 1 wherein said DRD renders the data after a render command is provided to the DRD by at the WD user.

3.(original) The method of claim 2 wherein said render command includes a passcode.

4.(currently amended) The method of claim 2 wherein rendering of the data by said DRD is controlled by the WD.

107 5.(currently amended) The method of claim 1 wherein the data is provided to said DRD directly from said WD.

6.(currently amended) The method of claim 1 wherein the data is provided to said DRD via a network supporting said DRD after the WD user identifies the DRD to a network supporting said WD, wherein a render command is provided by ~~said~~the WD user to said network in support of said WD and said network in support of said WD facilitates transfer of the data to said network supporting said DRD.

7.(currently amended) The method of claim 6 wherein the data is rendered by said DRD after said render command is provided by ~~said~~the WD user to said DRD.

A)  
8.(currently amended) The method of claim 6 wherein ~~said~~the data is retrieved from a mailbox assigned to ~~said~~the WD user only after ~~said~~the WD user provides a passcode to said DRD, and wherein said DRD renders ~~said~~the data after ~~said~~the data is delivered to said DRD.

9.(currently amended) The method of claim 8 wherein said passcode is provided to said DRD by ~~said~~the WD.

10.(original) The method of claim 8 wherein said passcode is provided at a user interface located within said DRD.

11.(original) The method of claim 6 wherein said command includes decryption coding.

12.(original) The method of claim 6 wherein said passcode includes at least one biometric.

13.(currently amended) The method of claim 1 wherein selecting athe DRD is accomplished by:

requesting a network supporting said WD to locate at least one DRD based upon a WD user profile; and

said network provides said WD with location information for at least one DRD not assigned to the WD and located in a fixed location accessible by the WD user to render the data.

A /  
14.(currently amended) The method of claim 13 wherein said network further provides WD with a passcode for use at said DRD to render the data as part of said ~~WD~~ user commands.

15.(currently amended) A method of brokering data between a wireless device~~devices~~ and a data rendering device (DRD)~~devices, comprising~~ not assigned to a wireless device (WD) and accessible to wireless device users, wherein a WD user performs the following steps at the WD:

selecting data ~~using a wireless device (WD)~~ for rendering data at a data-rendering device (DRD)~~a DRD~~;

entering a DRD locator request ~~at said WD~~ to find at least one DRD not assigned to the WD and accessible to the wireless device user;

receiving location information at said WD for the at least one DRD not assigned to said WD and accessible to the wireless device user;

selecting a DRD, ~~using said WD,~~ for rendering ~~said~~ the data; and

requesting that the data be provided to said DRD.

16.(currently amended) The method of claim 15 wherein the data is provided to said DRD via at least one network supporting communication of the data to said DRD from a network supporting said WD after a request to provide the data to said DRD identifies ~~the~~said DRD to ~~said~~the network supporting said WD.

A 1  
17.(currently amended) The method of claim 16 wherein ~~said requesting that data be provided to said DRD~~the request includes a render command provided by the wireless device user at said WD to ~~thesaid network in support of~~supporting said WD, and wherein ~~thesaid network in support of~~supporting said WD facilitates transfer of the data to said DRD via said at least one network supporting communication of data to said DRD.

18.(currently amended) The method of claim 17 wherein said step of requesting that the data be provided to said DRD includes a passcode provided by a~~the~~ WD user at said DRD.

19.(currently amended) The method of claim 17 wherein the data is retrieved from a mailbox assigned to said WD only after a passcode is provided to said DRD by a ~~user of said~~ the WD user, and wherein said DRD renders ~~said~~the data after ~~said~~the data is delivered to said DRD.

20.(original) The method of claim 19 wherein said passcode is provided to said DRD by said WD.

21.(original) The method of claim 19 wherein said passcode is provided at a user interface associated with said DRD.

22.(currently amended) The method of claim 15 wherein said DRD renders data after a render command is provided to ~~the~~said DRD by ~~at~~the WD user.

23.(original) The method of claim 22 wherein said render command includes a passcode.

A)  
25.(currently amended) The method of claim 22 wherein the data is provided to said DRD directly from said WD.

26.(currently amended) The method of claim 15 wherein the data is provided to said DRD directly from said WD and said requesting that the data be provided to the DRD is in the form of commands entered by the WD user at the WD.

27.(currently amended) The method of claim 15 wherein the data is provided to said DRD directly from said WD and said requesting that data be provided to the DRD is in the form of user commands entered at ~~the~~said WD and/or DRD.

28.(currently amended) The method of claim 15 wherein data is provided to said DRD at the command of a WD user associated with ~~the~~said WD via a network supporting said DRD after ~~said~~the WD user identifies ~~the~~said DRD to a network supporting ~~the~~said WD.

29.(currently amended) The method of claim 28 wherein a render command is provided by ~~said~~the WD user to said network in support of said WD and said network in support of said WD facilitates transfer of the data to said network supporting said DRD.

30.(currently amended) A method of brokering data between wireless devices and data rendering devices, comprising enabling a user of a wireless device (WD) to perform the following steps:

requesting ~~network~~ support from a network supporting ~~a wireless device (WD)~~ the WD to assist the user ~~the WD~~ in locating at least one data rendering device (DRD) not assigned to the WD and accessible to the user of the WD, said locating executed by the network following at least one of commands by the user or in accordance with a WD profile located in at least one of the WD and/or the network ~~for rendering said data;~~

selecting a DRD for rendering ~~said data;~~ ~~and~~

selecting data, ~~using a wireless device WD,~~ for rendering at the DRD; ~~and~~

providing the data to ~~said~~ the DRD for rendering.

31.(currently amended) The invention of claim 30, wherein ~~said~~ the DRD renders the data ~~to said DRD~~ after a render command is provided by ~~an authorized~~ the user associated with the WD.

CLAIMS 32-78 (Withdrawn)

[Please add the following new claims: ]

79.(new) The method of claim 1, further comprising:

receiving a request from said WD at a network supporting said WD to locate at least one DRD in accordance with a WD user profile associated with said WD;

locating at least one DRD matching said WD user profile; and

identifying at least one DRD matching said WD user profile to said WD in response to said request.

80.(new) The method of claim 79 wherein said WD user profile consists of WD location information.

✓ 81.(new) The method claim 79 wherein said WD user profile includes DRD capability criteria.

82.(new) The method of claim 79 wherein said WD user profile includes user destination information.

A1 ✓ 83.(new) The method of claim 79 wherein the data is received at said DRD via a communications network following the commands entered by the WD user at said WD, and said step of providing the data to said DRD is initiated at said WD and process through a wireless network supporting said WD.

84 missing ✓ 85.(new) The method of claim 79 wherein said step of rendering the data at said DRD follows a rendering command received at said DRD by said WD.

✓ 86.(new) The method of claim 85 wherein said rendering command includes a passcode.

87.(new) The method of claim 85 wherein said rendering of data at said DRD follows a rendering command received directly at said DRD by a user associated with said WD.

✓ 88.(new) The method of claim 85 wherein said rendering command includes

decryption coding.

89.(new) The method of claim 1 further comprising the steps of:

receiving at a network server a request associated with said WD for delivery of the data for rendering at said DRD;

determining if delivery of data can be approved by at least one of said network and/or DRD; and

if delivery is approved, said server processes the request including facilitating delivery of the data to said DRD.

AI  
90.(new) The method of claim 89 further comprising the steps of receiving the data from said server at said DRD.

91.(new) The method of claim 90 wherein the data is received at said DRD via a network supporting the DRD.

92.(new) The method of claim 90 further comprising the step of rendering the data at said DRD following a rendering command received at said DRD by said WD.

✓ 93.(new) The method of claim 92 wherein said rendering command includes a passcode.

✓ 94.(new) The method of claim 92 wherein said rendering command includes decryption coding.

95.(new) The method of claim 1 further comprising the step of rendering the data at said DRD following said commands, wherein said commands are locally received at said DRD by said WD.

↗ 96.(new) The method of claim 95 wherein said commands includes a passcode.

↗ 97.(new) The method of claim 95 wherein said rendering command includes decryption coding.

A1 98.(new) The method of claim 1 wherein said commands enable WD user manipulation of data during rendering of the data at said DRD using said WD.

99.(new) The method of claim 98 wherein said DRD is at least one of: a presentation projector, a video display, and a photocopier.

100.(new) The method of claim 1 wherein said DRD is at least one of: a presentation projector, a video display, a photocopier, an ATM machine, and an Internet Kiosk.

101.(new) The method of claim 100 wherein said rendering commands also enable user manipulation of the data during rendering at said DRD using said WD.

102.(new) The method of claim 31 wherein said commands enable the WD user to manipulate the data during its rendering at said DRD using said WD.

103.(new) The method of claim 102 wherein said DRD is at least one of: a presentation projector, a video display, a photocopier, an ATM machine, and an Internet Kiosk.

A1

104.(new) The method of claim 31 wherein said DRD is at least one of: a presentation projector, a video display, a photocopier, an ATM machine, and an Internet Kiosk.

105.(new) The method of claim 104 wherein said commands enable the WD user to manipulate the data during its rendering at said DRD using said WD.
